

Supplementary support plans

Subject: Technology and Computing **Grade:** 3° Bilingual **School Term:** II

Year: 2019

Recommendations

Every school term, the teacher formulates a problematizing question or problematizing situation related to the learning goals, which helps the student to be prepared to support his or her knowledges and skills levels in each area. This process is scheduled from Monday, May 20th to Friday, May 24th. The student must consult the bibliographic references recommended by the teacher within each subject and submit the three products worked in the school term by means of written papers using basic format rules to prove the acquired skills.

Problematizing question:

How can I use technological tools in order to improve my learning and to promote creativity?

Learning Goal:

The student identifies computer as a technological artifact for information and communication and uses it in different activities. In the same way, explores how are built some everyday use artifacts and how they work.

School term products:

1. Explain in your own words:
 - What is the internet?
 - What does WWW stand for?
2. Write down ten advantages and ten disadvantages of internet:

Advantages of internet	Disadvantages of internet

--	--

3. Research what are web browsers, draw three examples and put their names:

4. Explain in your own words what is the difference between a **web browser** and a **search engine**, draw three examples of search engines and put their names:

5. Draw down a keyboard, point its parts:
