

REINFORCEMENT ACTIVITIES

Subject: Mathematics

Grade: 3º

Period: II

Year: 2019

SUGGESTION

Each period, the teacher formulates a problematizing question or situation related to the learning goals that help the student to train him/herself and get ready to prove his/her knowledge and proficiency levels in each area. This process is scheduled for the week in May from 20th to 24th. The student should consult the bibliographic references cited by the teacher and turn in three academic products for the period written with basic standards to give account for the skills acquired.

1. Problematizing question:

How to develop mathematical strategies to solve everyday problems related to multiplication and measurement?

2. Learning Goals

General objective: Develop skills of mathematical reasoning and statistical language in students and used in everyday situations.

1. Know the measurable attributes of the numbers.
2. Use multiplication for solve simply problems.
3. Identify geometric shapes and draw the symmetry.

3. Academic products

- 1- Measure the following objects and use the meter tape.
 - The height.
 - Length and weight of each one.

2- For each picture, write the time in words and as a.m. or p.m.

3- Fill in $<$, $>$ or $=$ between each pair of number.

- 199 ____ 150
- 2130 ____ 5200
- 499 ____ 501
- 7300 ____ 7300

4- Solve the following problems.

- In the auditorium, there are 225 students, for children's day each student get 9 candies. How many candies have to buy in total?
- At the school, 326 bot. les are collected daily. How many bottles are collected in 5 days?

5- Which names receive the next angles?
